

Breast Implant Selection

A COLLABORATIVE PROCESS FOR YOUR BEST RESULT

Choosing the right implant is a partnership between you and your surgeon.
Three powerful tools help us design a plan that fits your body and your goals.

1

DIGITAL IMAGING SEE THE POSSIBILITIES

- ✓ Visualize different sizes and profiles on your own body
- ✓ Explore upper pole fullness, projection, and overall balance
- ✓ A starting point for a productive conversation

2

TRY ON IMPLANT SIZERS EXPERIENCE IT IN REAL LIFE

- ✓ The most accurate way to see volume and proportion
- ✓ Sizers go over the muscle – very close to your final result
- ✓ Try different sizes and profiles
- ✓ We'll fine tune together until it feels just right

SIZING GUIDE:

If your implants will go below the muscle, we typically add ~15% to the sizer volume to estimate your final implant size.

3

INSPIRATION PHOTOS SHARE YOUR GOALS

- ✓ Photos help us understand the overall look you love
- ✓ Focus on shape, fullness, and proportion – not just size
- ✓ We'll tailor the plan to fit your unique body

TIPS FOR GREAT PHOTOS:

- Similar body type and build
- Similar lighting and angles
- Front, side and 45° views are helpful

A result that looks natural, feels right, and fits your lifestyle.

It's not about the biggest implant—it's about the right implant for you.

THE GOAL

Proportional to your frame

Balanced and natural

Beautiful in clothes and out

Confidence that lasts

IMPLANT SELECTION IS BOTH SCIENCE AND ART.

With these tools—and an experienced surgical team—you can feel confident in a plan designed just for you.
